Digital Producer

WE ARE TOMMY, ARE YOU?

Are you an intelligent, proactive doer who is proud to own digital projects from inception through to delivery? Do you have a keen appreciation and admiration for process, but the wisdom to use it to improve the running of your projects without allowing it to run you? Are you well-versed in managing online advertising, interactive web experiences, and social content creation? Do you get a little giddy at the prospect of working with innovative technologies you've not tackled before? Do you strive to be your client's trusted guide through project work?

If so, you might be the best woman or man for this job. We are looking for a talented Digital Producer to join our close-knit and exceptionally talented team producing award-winning work for the likes of **Paramount Pictures**, **Amazon Video**, **Netflix**, **Sony Pictures**, and **Warner Bros**.

RESPONSIBILITIES

As the new digital producer for our global company, you will be responsible for working across a number of projects and client accounts simultaneously – gathering requirements, creating briefs and project plans, supporting clients and the internal team, and managing projects through from concepting to delivery while utilizing resources spread across offices in three timezones.

You are on the front line of the client experience and will work directly with nearly every member of our staff. Success in this role is key to all that we do, as you will be working to develop internal process at a growing company. Applicants must be comfortable and adept at working amongst teams spread across the globe and in a creative environment that is both fast-paced and sometimes intense. Brainstorming and managing industry-first executions is key to what we do at Tommy, and our Digital Producers should fit into that environment with ease.

SKILLS AND EXPERIENCE

Essential

- A portfolio of high-caliber digital projects delivered for impressive entertainment brands
- Demonstrable experience writing essential digital project management documents
- A thorough understanding of how technical aspects of digital projects work (such as hosting, environment set-up, database management, and similar so as to ask
